- 4) If she \_\_\_\_\_ (not/study) hard, she \_\_\_\_\_ (not/pass) the test.
- 5) If the weather \_\_\_\_\_ (be) nice, we \_\_\_\_\_ (go) to the beach.

**E) Read the paragraph and choose the correct option for each statement/question**

Thousands of years ago, the climate of North America became so cold that great sheets of ice, called glaciers, covered most of Canada and much of the northern part of the United States. The ice sheets were several miles thick in some places. The glaciers moved, pushing in front of them scooped-out soil and rock, which they left behind when they melted away. These heaps are called moraines. Long Island, Cape Cod, and Martha's Vineyard are mostly moraines. Huge boulders seen lying in fields were left by a glacier. The water in many, many lakes, including the Great Lakes, fills holes scooped out by glaciers.

**A. This story is mostly about -**

1. the history of glaciers.
2. how Long Island, Cape Cod, and Martha's Vineyard were made.
3. moraines.
4. how glaciers changed the land that we see today.

**B. Moraines are made up of -**

1. ice.
2. soil and rock.
3. boulders.
4. water in lakes.

**C. There are not as many lakes in the South as in the North because -**

1. the glaciers didn't move over the South.
2. there is less water there.
3. the South is less rocky than the North.
4. the holes that the glaciers scooped out have filled up in the South with rock and soil.

**D. Which of these statements is NOT true?**

1. Some glaciers were several miles thick.
2. Thousands of years have passed since the time of the glaciers.
3. Ice covered all of Canada and all of the United States.
4. When the glaciers melted, they left behind soil and rock.
